PROFESSIONAL EXPERIENCE

•Tech Mahindra — VF Corporation Client

Bengaluru, India

Associate Software Engineer

September 2024 – Present

- Maintain and enhance global brand websites (Vans, The North Face, Timberland) ensuring reliability for millions of users.
- Build and optimize Vue 3 and Nuxt 3 components using UnoCSS and Tailwind CSS for scalable, reusable UI patterns.
- Implement SEO and Core Web Vitals improvements, increasing LCP and FID scores across multiple brand pages.
- Collaborate with backend teams to integrate REST APIs, reduce payloads, and improve page load times by 20%.
- Conduct cross-browser testing and responsive design QA across 20+ regional sites.
- Write unit tests (Jest/Playwright) and perform code reviews to maintain high code quality.

•Ava Intern

Remote

Frontend Developer Intern

January 2024 – March 2024

- Developed 15+ React applications implementing infinite scroll, debouncing, and throttling.
- Reduced component load time by 30% through state optimization techniques.
- Enhanced UX metrics by 25% via dynamic rendering strategies.

TECHNICAL SKILLS AND INTERESTS

Languages: Java, JavaScript, C++, SQL, Python

Frameworks & Technologies: Spring Boot, React.js, Vue.js, Nuxt.js, REST APIs, JWT, Bootstrap, Tailwind CSS, UnoCSS, Supabase, Firebase

Tools: Git, GitHub, MySQL, Postman, VS Code, IntelliJ, Figma

Core Competencies: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

PROJECTS

•rideMarket – Car Rental Platform [\[GitHub\]](#)

Aug 2025 – Sep 2025

Nuxt 3, Supabase, Tailwind CSS, PostgreSQL

- Designed and developed a car rental platform with dynamic filtering by city, make, and price using Nuxt 3.
- Integrated Supabase for authentication (email/password + OAuth) and secure user session management.
- Used PostgreSQL database to store car details, images, and booking data with relational integrity.
- Implemented image upload and retrieval pipeline improving dashboard usability for admin users.
- Built responsive UI with Tailwind CSS achieving 100% Lighthouse accessibility score.
- Deployed project ensuring SEO-friendly server-side rendering (SSR) for faster page loads and better rankings.

•StoneStore – Stone Catalog Management App [\[GitHub\]](#)

Jun 2025 – Jul 2025

Vue.js, Pinia, Firebase, Tailwind CSS, Cloudinary

- Built a full-featured stone catalog platform with create, read, update, and delete (CRUD) functionality for stone listings.
- Integrated Firebase for authentication, real-time database updates, and secure data storage.
- Used Cloudinary API to store and deliver optimized images, reducing image load time by 35%.
- Managed global application state using Pinia, improving component reactivity and code maintainability.
- Designed responsive, mobile-friendly UI with Tailwind CSS ensuring smooth experience on all devices.
- Deployed application with production-ready configuration, ensuring seamless user experience.

ACHIEVEMENTS

- Knight** (Max Rating: 1892) at **LeetCode** - Top 6% among 5M+ users
- Pupil** (Max Rating: 1365) at **Codeforces** - Top 15% global rank
- 3-star** (Max Rating: 1698) at **CodeChef**
- DSA Mentor** Trained 300+ students in data structures and algorithms
